

**MedBiomix Partners SAS** and **GenoSplice** are proud to announce that they are entering in collaborative Network Alliance.

**GenoSplice** ([www.genosplice.com](http://www.genosplice.com)) provides high-level bioinformatics solutions as tailored services for analysis of genomics data (RNA, DNA and epigenetics). The company uses proprietary tools to provide its innovative services to international clients (Academics, Biotech and Big Pharma). GenoSplice platform allows to manage huge quantities of data from the production labs, turning raw complex data into easy-to-interpret biological information.

The MedBiomix network is assembling to become a global ecosystem of Public Centers of Excellence, IT and data-analytics/modelling companies, CDx and BioPharma industries, both partners and services providers in the area of Translational and Precision Medicine, Genomics and Computer Science.

Our common Goal is to generate rapid and accurate decision algorithms to help physicians take medical decisions to improve the life and disease conditions of their patients.
